

Vegetables and Nuts

CHILE: New Mexico chile production declined for the second year in a row to 73,400 tons, 17 percent below 2005. The decline was primarily due to a large drop in planted and harvested acreage. Overall state yields were down from a year earlier with jalapeño averaging 9.6 tons per acre. Long Mild averaged 12.9 tons per acre, and cayenne averaged 7.6 tons per acre. The value of New Mexico chile was estimated at \$39.63 million, 17 percent below the previous year.
